

Investing in the Future of STEM

San Diego Institute of Science and Technology (SD SciTech) expands the Elementary Institute of Science (EIS) programs to make a significant impact on high school students.

SD SciTech is a robust, STEM-based college preparation and leadership program for underserved students in southeastern San Diego and beyond. SD SciTech is the only college readiness program focused on STEM careers and academics in the greater San Diego region.

San Diego SciTech Programs

 **STEM Bridge** is a specialized initiative aimed at high school students engaged in EIS programs. The program focuses on enhancing STEM knowledge and provides a comprehensive support system including mentorship, tutoring, financial aid assistance, and college or job application guidance.

 **Girls Take Flight** is an intensive, 6-month program providing high school 10th and 11th grade girls hands-on experiences. They build, program, and fly drones to become FAA certified commercial drone pilots. This is the only program of its kind in the United States and the curriculum was developed by the Elementary Institute of Science.

 In **Teen STEAM Cafe**, students research current issues that affect them and their local community and examine it through the lens of science. They connect with local STEM experts, conduct community meetings to share and collect information, and make presentations to elected officials.

 **Creeks to Peaks** is a comprehensive, tri-level educational initiative designed to provide high school students with a deep understanding of environmental science. This program aims to cultivate future scientists committed to environmental conservation and sustainability culminating in a 26-day Jackson Hole, WY expedition with the Teton Science Schools.

 **Teen Lab Assistants** are high school student volunteers that assist EIS Instructors, serve as positive role models to students, improve their own STEM content knowledge, and earn volunteer hours.

Sponsorship Opportunities

	\$50,000 Founding Level	\$25,000 Role Model	\$15,000 Mentor	\$10,000 Advocate	\$5,000 Ally
Founding sponsor framed plaque	⚙️				
Permanent logo display on website	⚙️				
Annual dinner with program participants	⚙️	⚙️			
Exclusive “Presented By” recognition on program materials and communications	⚙️	⚙️			
Branding opportunity to sponsor an individual SciTech Talks event (4 events/year)	⚙️	⚙️			
Opportunity to present at San Diego SciTech program events (4 events/year)	⚙️	⚙️	⚙️
